chrismakesweb@gmail.com | github.com/mightbechr1s | linkedin.com/in/cw-webster-ba7266425

SUMMARY

IT student and self-taught developer with 4+ months of hands-on experience building full-stack web applications. Skilled in JavaScript, React, Node.js, and cloud deployment. Shipped 5+ personal projects to production, including a recipe platform (Yield) serving 500+ registered users. Currently available for part-time, freelance, or project-based work.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Next.js, Tailwind CSS

Backend: Node.js, Express.js, PHP, REST APIs

Database: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Vercel, Railway, npm, Linux, Windows

Other: Agile/Scrum, Technical Documentation, UI/UX Design, Responsive Design

PROJECTS

Yield — AI Recipe Platform

Full-Stack Developer | Personal Project | 2026

- Built a web app that generates recipes from pantry ingredients using AI-powered food recognition
- Implemented user authentication, subscription model (3-recipe free trial), and Stripe-ready payment flow
- Designed and managed MongoDB schema with users, recipes, ingredients, and subscriptions
- Deployed frontend on Vercel, backend on Railway, packaged Android APK with Capacitor
- **Result:** 500+ registered users, 1.7K+ recipe views, 4.9 GB bandwidth in 2 months

FarmRoute — Cooperative Logistics Platform

Full-Stack Developer | Thesis Project | 2026

- Developing a logistics platform for agricultural cooperatives to manage harvests, orders, and truck dispatching
- Building RESTful API with Node.js and Express, database schema for trucks, members, and harvest records
- Implementing real-time truck tracking and route optimization
- **Status:** In development (target: August 2026 pilot)

StockFlow — Inventory & Sales Management System

Full-Stack Developer | Personal Project | 2025

- Created a web-based inventory management tool with daily sales tracking and transaction history
- Implemented CSV data export, low-stock alerts, and profit calculation features
- **Result:** Fully functional CRUD application deployed on GitHub Pages

SkillSync — Student Collaboration Platform

Java Developer | Academic Project | 2025

- Built a desktop application with real-time chat, task board, and skill-based team matching
- Applied Java design patterns: Observer, Factory, and MVC architecture
- Integrated SQLite for local data persistence

EXPERIENCE

Project-Based Developer (Freelance)

Self-Employed | 2025 – Present

- Built and deployed web applications for personal and academic use, managing full project lifecycle
- Collaborated with thesis team to design and develop a cooperative logistics system
- Continuously learning new technologies through self-directed projects and online courses

EDUCATION

Bachelor of Science in Information Technology

Currently 2nd Year | Expected Graduation: 2029

CERTIFICATIONS

- Introduction to Cybersecurity — Cisco Networking Academy (2025)
- JavaScript Essentials 1 — Cisco Networking Academy (2025)
